ABSTRACT OF THE DISCLOSURE

A method of providing a certificate from a client to a server is disclosed. The method comprises receiving a request for a certificate from the server and forwarding the request to a biometric certification server (BCS). The method further includes receiving a biometric identification from the client and forwarding the biometric identification to the BCS. If the biometric identification matches a registered user on the BCS, receiving a certificate including a public key of the client certified by the BCS, and forwarding the certificate to the server, thereby identifying the client to the server.
